10

SERIES
AIR CART

THE SEEDING EXPERIENCE YOU NEED.

morrisequipment.ca

Take Your Operation to the Next Level.

The 10 Series air cart is designed to optimize the number of acres our customers plant each day.

This air cart series is loaded with customer-inspired ideas and technology to minimize the time spent on setting and filling operations and to maximize the number of acres planted for each fill. The 10 Series air cart oozes quality with a plethora of premium componentry and materials to provide years of low-maintenance, trouble-free service. Morris knows the pressure farmers are under when planting crops in a narrow window of time and designed the 10 Series to ease this burden.

Seed With Confidence.

LOAD CELLS UNDER EACH TANK

Be confident about product weight going in and out of each tank.

DYNAMIC CALIBRATION

Spend less time calibrating. Use calibration correction to maximize seeding efficiency.

Less Time Filling.
More Time Seeding.

CONVEY-ALL CONVEYOR

This single belt conveyor with low profile hopper fills tanks rapidly (100 + bu/minute) and features a stainless steel top and bottom to keep this machine looking good for years. A 10-way remote control is used for movement and speed.

Agronomically
Superior by Design.

MAXIMIZE ACRES PER FILL

Tanks are sized to empty at the same time by applying agronomic principles and established nutrient uptake ratios.

OPTIMIZER TANK

This tank will hold two mini-bulk bags of canola and can be used to optimize the acres per fill when planting other crops.

10 series 820 model					
CROP	OPTIMIZER (80 BU)	TANK 2 (250 BU)	TANK 3 (135 BU)	TANK 4 (355 BU)	MAXIMUM ACRES/FILL
	ACRES/FILL				
cereal	30 (46-0-0)	150 (seed)	151 (11-52-0)	126 (46-0-0-)	150 acres/fill
canola	800	62 (N-P blend)	210 (11-52-0)	88 (N-P blend)	150 acres/fill
pea	inoculant	197 (N-P-K-S blend)	45 (seed)	112 (seed)	157 acres/fill

Assumptions: Some products use more than one tank to maximize acres/fill (e.g. Cereal Optimizer tank + Tank 4 is 30 + 126 = 156 acres/fill). **Seeding rates:** Wheat 30 live seed/ft2; Canola 10 seed/ft2; Pea 8 seed/ft2. **Fertilizer rates:** (lb/ac actual N-P-K-S): Wheat 80-35-0; Canola 120-50-0-24 with sulfur broadcast; Pea 14-25-15-8. At higher application rates, tanks empty at the same time but with reduced acres/fill.

HIGH CAPACITY FANS

Push big product rates with the new 22" diameter fans and the optional AirGuard blockage prevention system.

FAST, CONVENIENT ADJUSTMENTS

Morris uses a common metering wheel in each metering body. A single lever adjusts seed plate clearance when metering different products.

Efficient Tank Capacity

The 10 Series tanks have large top lids for highly efficient filling and steep angles on the hoppers for improved emptying.

REDUCED FOOTPRINT

Reduce soil compaction and get stuck less with larger tires and rims.

Light Up the Night.

25000 lumen light system makes operation at night easy. Lights are located inside tanks, on walkways, under tanks as well lights to illuminate the drill.

Next Generation Sectional Control.

ELECTRIC-DRIVEN METERING

All new metering system driven by 24 V brushless motors with infinitely adjustable rates.

SEED METER GEAR BOX

A 40:1 worm drive gear box with sealed housing and stainless steel output shaft connects the electric motor to the metering wheel.

SPIRAL FLUTED METERING WHEEL

The spiral fluted metering wheel is a Morris staple – its continuous flow of product into the air stream is the gold-standard in metering accuracy.

Rate range: 20-300 lb/ac.

OPTIMIZER TANK METERING WHEEL

This metering wheel is used in the Optimizer Tank™ and delivers outstanding low-rate flow of product into the air stream.

Rate range: 1-50 lb/ac

Top Notch Controls.

FULLY AUTOMATED SECTIONAL CONTROL

Topcon's proven fully adjustable and automated sectional control eliminates overlap and seeding misses.

IMPLEMENT COVERAGE SHARING

When seeding in the same field with multiple seeding systems, coverage maps are shared between machines so that the sectional control systems prevent seeding over land already planted.

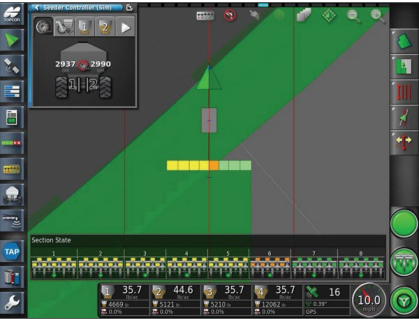

PACKING FORCE CONTROL

This feature maintains consistent packing force and optimizes opener penetration across variable soil conditions by managing opener hydraulic pressure on Quantum drills equipped with this feature.

LIFT CONTROL

This feature automatically lifts and lowers the Quantum drill on headlands.

● Actual packing force and opener operating pressure ● Lift control settings and activation status

NEW TOPCON XD+ MONITOR

Optimize workflow with full-feature customization.

TOPCON AGRICULTURE PLATFORM (TAP)

This subscription-based feature synchronizes data effortlessly from in-cab and the office through TAP and works with nearly any data format.

Variable Rate by Section.

Morris' new electric metering system is capable of varying product rates for up to 10 sections.

Quality You Can Rely On.

Premium Finish & Materials.

STAINLESS STEEL IN ALL THE RIGHT PLACES

The conveyor top and bottom, metering bodies, collector bodies, primary pipes and quick-access doors are all made from high-grade stainless steel.

POWDER COAT PAINT

We use a premium UV-resistant powder coat paint to keep the 10 Series air cart looking great for years.

Premium Componentry

ALTERNATOR

A hydraulically driven 150 amp brushless alternator sends power to the metering system.

DUST SEALED ELECTRONICS

The alternator and Topcon controls are housed in a dust-free environment.

24 V ELECTRIC MOTORS

Morris selected an over-built, maintenance-free brushless electric motor with 3x the power of other manufacturers so when you are working hard, the motors will be hardly working.

Premium Experience

IMPROVED STAIRS

The flip-up bottom step with gas shock reduces the potential for damage and provides superior ergonomics.

CONVENIENT ADJUSTMENTS

All settings are done from the left-hand side. This includes calibration, adjusting seed plates and double shoot collectors as well as the easy new tank shut-off gates.

XTEND CONVENIENCE FEATURE

This app eliminates going back and forth between the air cart and tractor cab when doing rate calibrations.

Series 10 Air Cart
