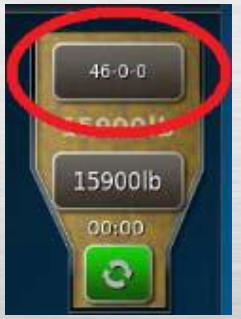
X30 Monitor Training

ICT Module 5 : Reference Sheet

Step 1

- Follow the original X30 user guide from Chapters 1-9. At this stage, you will have:

Loaded a field and created a job.



Added Products to each tank

Performed calibration tests on all tanks

Step 2

- From the Seeder-Home Screen;
  - Turn On each Tank
  - Ensure your Job Settings are correct
  - Review your Requested Rates are correct
  - Slide the Section State window down to reveal ICT-SECTION

Step 3

- On the Mapping Screen:
  - Engage each section
  - Coverage Area; Toggle Full Width to ICT-SECTION
  - Turn ASC OFF and then turn ASC ON (this must be performed)
  - Boundary Limit: Headland
  - Engage the Virtual Master Switch
  - When the countdown timer reaches 2 seconds Drive forward.
  - Seeder will change to the color Green when the Sections / Metering are active.
